

ESTIMATED PRICING SCHEDULE (Non UK)

Papa Pump®

the pump that uses no fuel!

The schedule below estimates the cost of a Papa Pump installation in a worldwide location. Materials, labour and taxes will vary widely from country to country. This estimate is based on an actual Papa Pump installation in the mountains of Nepal. The 5 pump system was mainly built and installed by the local community under the guidance of a charity who partly funded the project. The required water delivery was 6,000 litres per day - the 5 pump system actually delivered 19,000 a day and is maintained by the local community

Schedule based on actual Papa 5 x Pump installation in Nepal (prices in US dollars)
